

LEAD GLASSES MODEL Q300

FRAME INFORMATION

The Q300 Radiation Safety Glasses feature high-quality, distortion-free SF-6 Schott glass radiation-reducing lenses with 0.75mm Pb lead equivalency protection and 0.50mm Pb lead equivalency lateral protection. The Q300 radiation safety glasses have clear CE Certified Lens and weigh 78g. They are also prescription available. Plus, the Q300 radiation glasses are made of high-quality plastic, featuring a durable and lightweight rectangular, wrap-around frame. In addition, these Phillips Safety lead glasses feature rubberized nosepads, rubberized temple bars, and leaded side shields. They are available in black.
